

Indoor Bowling

DURALAY 'PREMIER' RANGE OF UNDERLAYS

Very careful consideration must be given to the quality of underlay installed under your 'Premierweave' surface to achieve the most suitable bowling characteristics for each individual club.

This is dependant on the rink width available, the number of end rinks on the green, or the speed of green required.

Our 'Premier' range of underlays, manufactured by the leading UK manufacturer, Duralay Ltd, can provide your club with a choice to suit all requirements.

Because of the vital importance of this aspect of the indoor bowling green **INBOWLS & LEISURE (SPORTS SURFACES) LTD** has made careful consideration before choosing Duralay in their range of products.

ADVANTAGES OF USING THE DURALAY 'PREMIER' RANGE OF UNDERLAYS

- **PROLONGS SURFACE LIFE** - Ensures a high playing consistency of surface over the life of the underlay ensuring an accurate bowling surface with superb bowling characteristics.
- **MINIMISES INDENTATIONS** - Specially engineered to stand up to the rigorous wear of indoor bowling up to 15 hours a day, 7 days a week.
- **SUPERIOR COMFORT** - Ensures ultimate player comfort with an excellent underfoot feel for extended periods of play.
- **GUARANTEED PERFORMANCE** - A proven record of performance in over 80% of all indoor bowling clubs.
- **GUARANTEED GREEN SPEEDS** - The new xPremierx range has a much reduced density tolerance thus ensuring the exact xspeed of greenx required by each individual club.
